

WHY BUY FROM US?

- Our elk and bison are fed a diet of 100% pasture grasses and harvested hay, never any grain.
- We do not put any herbicides or pesticides on our grasses or animals.
- Our animals are not given any hormones or sub-therapeutic antibiotics.
- The Colorado State Veterinarian's Office has certified our elk herd free of CWD. We have been voluntarily monitoring our herd for the disease since April 1996, one of the first elk herds in the nation.
- All our animals are dispatched under USDA inspection at the ranch or at Cedaredge Processing, nine miles from the ranch, this enhances the flavor due to less stress.
- All our meat is USDA inspected, professionally processed, and vacuum packaged. There are no nitrates added to any of our meat products.

ADVANTAGES OF NATURAL PASTURE RAISED BUFFALO & ELK MEAT

- LESS FAT
- FEWER CALORIES
- MORE OMEGA-3 FATTY ACIDS
- HIGHER CONGULATED LINOLEIC ACID (CANCER FIGHTING AGENT)
